

Guidance for Propak Asia 2015

We will exhibit the “Soarnol™” to ProPak Asia 2015, an exhibition to be held in Bangkok, Thailand.

We are looking forward to your visit.

Period: Wednesday, June 17 to Saturday, June 20, 2015
Venue: Bangkok International Trade & Exhibition Centre (BITEC)
Hall: Hall 106, Booth 6C15
Exhibit products: “Soarnol™” (Ethylene-vinyl alcohol copolymer)
Exhibition site: <http://www.propakasia>

“Soarnol™”

“Soarnol™” is a key material for packaging film that keeps the taste and freshness of food and blocks oxygen, thus not only preventing the occurrence of food spoilage and mold but also keeping the aroma and flavor of the food. “Soarnol™” is excellent in transparency and printability, and effective in showing the food beautifully. Furthermore, “Soarnol™” shows high-barrier performance against all types of gases including oxygen, and has solvent barrier performance and oil resistance as well. Therefore, “Soarnol™” has been applied to floor heating pipes and resin-made gasoline tanks as well, and it has been expanding applications in the industrial field.
