Place : Shanghai New International Expo Centre

2345 Long Yang Rd. Pudong, Shanghai China

Hall : N1, Booth: E01

Exhibition web: <http://www.chinaplasonline.com/>

Products : “Hi-SelonTM” : Water soluble PVOH film

『Hi-SelonTM』

“Hi-SelonTM” is a water-soluble film made from polyvinyl alcohol.

It is available in a wide range of types, from those that are soluble in cold water to those that are soluble in hot water, to respond to diverse needs.

With its excellent heat-sealing property and printability, Hi-Selon is ideal for use as a packaging material, but it also provides many other advantages, including high solvent resistance and gas barrier performance, which benefit diverse applications and are widely used as materials for packaging agricultural chemicals and pharmaceuticals, hygiene purposes, printing on curved surfaces, and as base materials for wigs and embroidery.
