

Impact of 2016 Kumamoto Earthquakes on Nippon Gohsei (6th Report)

Our deepest sympathy goes out to those affected by the 2016 Kumamoto Earthquakes. We pray for the fast recovery of the affected areas as early as possible.

We would like to make our 6th report on the situation of Nippon Gohsei as of 3:00 p.m. on May 31.

Description

Situation of Kumamoto Plant

The production facilities of our Kumamoto Plant are under restoration and any of them finished with restoration will resume operations in sequence.

As of May 31, we forecast the following production resumption.

“OPL-Film”

The production facilities are under restoration, and any of the facilities finished with restoration will go into trial operation and resume production in sequence in the middle of June.

Our Ogaki Plant is substituting the production of some series of “OPL-Film”.

“Gohsenol” and “Gohsenx”

- 1) The production of “Gohsenx Z” will resume early in June.
- 2) The production of “Gohsenol EG” will resume early in June.
- 3) The production of “Gohsenx L-3266” will resume in the middle of July.

Other series of “Gohsenol” and “Gohsenx” will resume in September because the restoration of the facilities will take time.

Our Mizushima Plant is substituting the production of some series of “Gohsenol”.

We will continue doing our best for the restoration of the Plant, and keep you informed of any progress in the situation.
