## Increase in the Sale Price of Vinyl acetate monomer

The Nippon Synthetic Chemical Industry Co., Ltd. (hereinafter referred to as “Nippon Gohsei”) has decided to raise the selling price of Vinyl acetate monomer to be shipped on and after July 10, 2018, and will start negotiations with customers.

Nippon Gohsei is striving to reduce costs continuously. However, due to the recent price rises in acetic acid, naphtha and other raw material prices, power, and heating expenses, it has become difficult to absorb the cost increases. That is why Nippon Gohsei has decided to raise the price in order to correct its profitability and secure the stable supply of raw materials.

Although the economic environment continues to be tough, Nippon Gohsei is seeking to obtain customers’ understanding.
